

## COMPANY OVERVIEW

Preferred Controls is a Midwest-based electrical and controls engineering firm established in 1998, providing continuous service for more than 28 years. With offices in Albany and Arlington, Minnesota; Minot, North Dakota; Marshalltown, Iowa; and Omaha, Nebraska, the company specializes in electrical and control system design for the water and wastewater industry.

Preferred Controls delivers technically advanced solutions with an operator-friendly approach. The team is known for taking on complex, technically challenging projects that many integrators are unable—or unwilling—to handle, bringing innovative thinking and deep system understanding to every engagement.

**Albany, MN**  
460 Husky Drive • Suite 102  
Albany, MN 56307  
320-845-6772

**Marshalltown, IA**  
809 N. 3rd Ave.  
Marshalltown, IA 50158

## CORE COMPETENCIES

- Electrical and control system design for water and wastewater facilities
- PLC programming
- HMI and OIT programming
- SCADA systems
- Systems integration
- System commissioning
- Radio, cellular, satellite, and licensed communications
- Cybersecurity
- Project management
- Camera systems
- Information technology

## PROFESSIONAL SERVICES

Preferred Controls' staff includes licensed professional electrical engineers capable of producing certified electrical plan sets and advanced system designs.

Professional offerings include:

- Power studies
- Short circuit coordination studies
- Arc flash studies
- Comprehensive electrical design services

## PANEL SHOP & CERTIFICATIONS

Preferred Controls operates a **UL Listed panel shop**, including:

- UL 508A (Industrial Control Panels – U.S.)
- UL 508A (Industrial Control Panels – Canada)
- UL 698A (Industrial Control Panels for Hazardous Locations)

Panels are built to high performance standards and engineered for long-term durability.

## EXPERIENCE & PAST PERFORMANCE

Preferred Controls has delivered electrical and control system solutions for hundreds of clients for more than 28 years. The team has supported facilities of all sizes and complexities, from single-site systems to large, multi-process treatment operations, providing design, integration, panel fabrication, commissioning and ongoing support.

This broad experience enables Preferred Controls to reliably deliver operator-friendly, scalable solutions that integrate with existing infrastructure and meet long-term operational and regulatory needs.

## DIFFERENTIATORS

- Specialized focus on water and wastewater control systems
- Proven ability to modernize and integrate with legacy systems of all types
- Willingness to take on complex projects that others decline
- Licensed professional engineers on staff
- UL Listed panel shop with hazardous location capabilities
- Operator-friendly design philosophy
- Backed by the operational expertise and scale of PeopleService

We partner with some of the largest brand names in the industry.
